

# Mark Scheme (Results)

November 2011

GCSE Mathematics (2381)  
Paper 5381F\_5A (Calculator)

Edexcel is one of the leading examining and awarding bodies in the UK and throughout the world. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. Through a network of UK and overseas offices, Edexcel's centres receive the support they need to help them deliver their education and training programmes to learners.

For further information, please call our GCE line on 0844 576 0025, our GCSE team on 0844 576 0027, or visit our website at [www.edexcel.com](http://www.edexcel.com).

If you have any subject specific questions about the content of this Mark Scheme that require the help of a subject specialist, you may find our **Ask The Expert** email service helpful.

Ask The Expert can be accessed online at the following link:

## NOTES ON MARKING PRINCIPLES

### 1 Types of mark

M marks: method marks

A marks: accuracy marks

B marks: unconditional accuracy marks (independent of M marks)

### 2 Abbreviations

cao – correct answer only

ft – follow through

isw – ignore subsequent working

SC: special case

oe – or equivalent (and appropriate)

dep – dependent

indep - independent

### 3 No working

If no working is shown then correct answers normally score full marks

If no working is shown then incorrect (even though nearly correct) answers score no marks.

### 4 With working

If there is a wrong answer indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

If working is crossed out and still legible, then it should be given any appropriate marks, as long as it has not been replaced by alternative work.

If it is clear from the working that the “correct” answer has been obtained from incorrect working, award 0 marks. Send the response to review, and discuss each of these situations with your Team Leader.

If there is no answer on the answer line then check the working for an obvious answer.

Any case of suspected misread loses A (and B) marks on that part, but can gain the M marks. Discuss each of these situations with your Team Leader.

If there is a choice of methods shown, then no marks should be awarded, unless the answer on the answer line makes clear the method that has been used.

### 5 Follow through marks

Follow through marks which involve a single stage calculation can be awarded without working since you can check the answer yourself, but if ambiguous do not award.

Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

**6 Ignoring subsequent work**

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question: e.g. incorrect canceling of a fraction that would otherwise be correct

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect e.g. algebra.

Transcription errors occur when candidates present a correct answer in working, and write it incorrectly on the answer line; mark the correct answer.

**7 Probability**

Probability answers must be given as fractions, percentages or decimals. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths).

Incorrect notation should lose the accuracy marks, but be awarded any implied method marks.

If a probability answer is given on the answer line using both incorrect and correct notation, award the marks.

If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.

**8 Linear equations**

Full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously indicated in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded.

**9 Parts of questions**

Unless allowed by the mark scheme, the marks allocated to one part of the question CANNOT be awarded in another.

**10 Money notation**

Accepted with and without the “p” at the end.

**11 Range of answers**

Unless otherwise stated, when any answer is given as a range (e.g.  $3.5 - 4.2$ ) then this is inclusive of the end points (e.g. 3.5, 4.2) and includes all numbers within the range (e.g. 4, 4.1).

5381F_5A					
Question		Working	Answer	Mark	Notes
1	(a)	Red 7 Blue 5 Silver 8 Green 5	Correct frequencies	2	B2 for all frequencies correct (B1 for 2 tallies or 2 frequencies correct)
	(b)		Correct bars	2	B2 ft for all bar heights correct with or without gaps (B1 ft for 2 bar heights correct)
	(c)		Silver	1	B1 ft
2			$\frac{1}{4}$	1	B1 for $\frac{1}{4}$ oe
3	(a)	18, 20, 24, 25, 36, 36, 45, 48 (25+36) ÷ 2	30.5	2	M1 for ordering data or selecting mid values without ordering A1 for 30.5 cao
	(b)	24+36+18+25+45+36+48+20 = 252 252 ÷ 8 =	31.5	2	M1 for evidence of adding all 8 scores and dividing by 8 A1 cao
	(c)	32 × 9 = 288 288 – 252 =	36	2	M1 for attempt to multiply 32 by 9 or 288 seen A1 cao

5381F_5A					
Question		Working	Answer	Mark	Notes
4	(a)		$10 < t \leq 20$	1	B1 cao
	(b)		Frequency polygon	2	<p>B2 for complete polygon (ignore histograms and any lines below a time of 5 or above a time of 45, but award B1 if there is a line joining the first point to the last point)</p> <p>(B1 for:  only one plotting error of the points and points joined with line segments  or  plotting all points correctly but not correctly joining with line segments (in this case ignore a line joining first point to last point)  or  incorrect but consistent plotting of all points within each interval (not midpoints) and correctly joining the points with line segments (in this case ignore a line joining first point to last point))</p> <p>Plotting tolerance <math>\pm</math> half square  Points to be joined by straight lines but not curves. Accept ruled or hand-drawn lines.</p>
