Instructions

Use black ink or ball-point pen.
Fill in the boxes at the top of this page with your name, centre number and candidate number.
Answer all questions.
Answer the questions in the spaces provided – there may be more space than you need.
Calculators may be used.

Information

The marks for each question are shown in brackets – use this as a guide as to how much time to
spend on **each** question.
Questions labelled with an **asterisk** (*) are ones where the quality of your written communication
will be assessed – you should take particular care on these questions with your spelling, punctuation
and grammar, as well as the clarity of expression.

Advice

Read each question carefully before you start to answer it.
Keep an eye on the time.
Try to answer every question.
Check your answers if you have time at the end.

Diagram **NOT** accurately drawn

PQ is a straight line.

(a)   Work out the size of the angle marked $x°$.

$$180 - 126 = 54$$

_____54_____ °

(1)

(b) (i)   Work out the size of the angle marked $y°$.

$$180 - (2 \times 54) = 72$$

_____72_____ °

(ii)   Give reasons for your answer.

   - Angles in a triangle add up to 180.
   - Base angles are equal in an isosceles triangle
